

# Count on Bradford White

## for *Everything* Hot Water

So much has changed in recent years at Bradford White that we thought it was time to re-acquaint you with everything we offer. To put it simply, we have it all from 2-gallon compacts to industrial giants, from super-efficient eF Series® commercial units that set the standard in their class to large storage tanks with capacities to more than 5,600 gallons. Our Defender Safety System™ FVIR technology is second to none and our new EverHot® line of tankless, gas-powered water heaters is a huge success.

Our selection of light, medium and heavy-duty Commercial gas and electric water heaters now rivals any line available. Residential gas and electric models have evolved to handle any application or installation challenge. We've added indirect-powered water heaters, pool heaters, instantaneous electrics and even air handlers. Our oil-powered offerings have also grown and now include five residential models, 18 commercial models and oil burners in 14 different configurations.

The list of all we have for the trade just keeps growing. Our growth is a direct result of the support you've shown us. Thank You. While many things have changed, the most important reason to choose Bradford White remains. We are a company dedicated to the trade and to the people whose livelihood depends on it.

## We Have It All.
